

OUR HISTORY...

Mountain Wastewater Management (MwM)

began in 2008 to provide sewage system maintenance services for alternate type systems in northern Pennsylvania. With more than 3 decades of experience as designers and site qualifiers, we found that offering product sales and support for manufacturers at the time of installation was the optimal way to ensure long-term success for septic systems.

MwM currently represents an expanding array of sewage system product lines, including American Manufacturing Company, Anua International, Norweco, and Infiltrator Water Technologies.

We are insured, and manufacturer-authorized for Operation & Maintenance (O&M) for most wastewater treatment components. Our MwM service providers are certified by Pennsylvania Septage Management Association (www.pasma.net) as Onsite Wastewater Treatment System Inspectors.

PRODUCT SALES AND SUPPORT

MwM trucks and trailers deliver system component packages to your job site!

Our people patiently provide installers hands-on training when they are unacquainted with new technologies.

We oversee installations on small and large projects and offer O&M annual contracts. We educate owners and officials, conduct start-up meetings, and provide warranty support.

IT'S ALL ABOUT CLEAN WATER!

PROTECT YOUR SEWAGE SYSTEM WITH REGUL signs of unwanted water entry OPERATION & MAINTENANCE (O&M)

Mountain Wastewater Management provides Operation and Maintenance (O&M) plans for **residential, commercial, large flow,** and **community** sewage systems.

O&M service includes:

- Maintenance, monitoring and minor repairs
- Inspections of all tanks for structural integrity and solids accumulation and signs of unwanted water entry
- Inspections of all system components
- Regular cleaning of effluent filters
- Reports to you and agencies (as requested), with phone call updates

O&M of your wastewater treatment system helps to protect your real estate investment.

By early detection of problems, our goal is to prevent malfunctions. Your preventative program and O&M records can help you to be permit compliant and ready for property resale.

MwM service providers are insured, trained, and manufacturer-authorized to inspect tanks, pre-treatment components, alarms, pumps, control panels, disinfection units, absorption areas, and drip fields. Under annual contracts, we provide scheduled inspection and operational maintenance visits. We follow-up with phone calls, owner education, and written reports for your records. We provide emergency responses for alarm situations.
